First all I pay for having access to XM radio. I should be able to make my own decision of whether I listen to the local radio stations or whether I listen to XM radio. I am an owner-operator who travels daily over the road. NAB should not have the power to tell me what I can or can not do. XM radio provides quality services. Maybe the radio and television owners should update their services. Maybe NAB should travel over the road and see which is more convenient, etc. I'm sure they'll choose XM radio.
